The National Business & Disability Council (NBDC) at The Viscardi Center connects qualified job seekers with disabilities to employers who are actively seeking the talents that they offer.

We recently launched the Disability Employment Source (DES), a free platform which connects job seekers with disabilities to careers that best suit their skills. Our platform is powered by cutting-edge technology but is simple to use for applicants and employers. The DES makes it easy for job seekers to search and view available opportunities throughout the U.S.

The platform provides your job seekers with a skills assessment, resume builder, and access to over 250 trainings to gain essential skills for success in the workplace. Your students will also obtain a certificate upon completion of the online trainings. In addition, they will have access to mentors that can support their career goals and provide ongoing guidance on the employment journey. The platform is free for job seekers.

We encourage you and the students that you work with to visit this exciting NEW free Resource at <http://des.nbdc.com/>!

Should you have students that are seeking internship opportunities, NBDC offers the Emerging Leaders Internship Program for College Students with Disabilities. Emerging Leaders accepts students with disabilities from across the United States for internship opportunities in various industries with employers who are actively seeking to connect with individuals with disabilities. Visit our

website at
<https://www.viscardicenter.org/nbdc/emerging-leaders-students/> for more information on how your students can become the next Emerging Leaders!

To find out more about how you can maximize these incredible resources contact ceisenberg@viscardicenter.org or (929) 418-1154.

We hope that you will share this with the students with disabilities that you work with!

Sincerely,

Christina Eisenberg
Manager, the National Business & Disability Council (NBDC)
